EDUCATION

Master of Science in Computer Science May 2023
Worcester Polytechnic Institute, Worcester, MA, USA

Bachelor of Engineering in Information Technology Oct 2020
University of Mumbai, India

SKILLS

TypeScript, JavaScript, Java, NodeJS, AWS, Serverless, Cloudformation, Git, AI, MCPs

WORK EXPERIENCE

Senior Software Engineer, Genesys, USA June 2023 – Present

- Automating development workflow using AI

Software Engineer, Genesys, USA May 2023 – June 2026

- Piloted Cursor AI to increase team productivity, successfully scaling the tool to 100% of the organization.
- Won internal hackathon prize for building a Model Context Protocol (MCP) server that integrated public APIs with IDEs and Amazon Bedrock, making it extremely user friendly to interact with APIs.
- Designed and implemented AWS Step Function workflow for distributed computing, bringing the total compute time down from hours to under 18 minutes for a key project, ensuring scalability and resiliency.
- Deployed a robust public API, prioritizing precise schema design and exhaustive error handling to support high-reliability integration for external consumers.

Technologies: TypeScript, AWS, Java, AWS, MCP, API, NodeJs

Software Engineer - Intern, Genesys, USA May 2022 – May 2023

- Led the successful migration of microservices from Hystrix to Resilience4j, ensuring fault tolerance without disrupting the production environment, a critical step in enhancing service reliability and uptime.
- Decoupled testing architecture by enforcing strict separation of concerns, resulting in a more maintainable unit testing suite and a significant reduction in debugging time.

Technologies: Clojure, Kotlin, AWS, Circuit-Breakers, Unit Testing

Trainee Assistant Consultant - Software, Credence Analytics, India Mar 2021 – Jun 2021

- Collaborated with the CEO in building ERP system using Python, JavaScript, HTML, CSS, and SQL.
- Deployed Application Monitoring System on Linux Instance using Elasticsearch making monitoring of critical services like AWS, Oracle Database, and microservices effortless.

Technologies: WSL(Linux), Python, SQL, JavaScript Frappe Framework, NodeJs

Back End Developer - Internship, Credence Analytics, India Aug 2020 – Feb 2021

- Created a CLI tool [CREDCLI](#) from start to finish to automate software updates. The tool create patch file based on the difference in git branches; cutting the manual work by more than 50%.
- Published a package called [Parsifier](#) in NPM which helps in modifying configuration files thus totally eliminating redundant manual work.

Technologies: JavaScript, NodeJS, Docker, Unit Tests, Git, Elasticsearch

PROJECTS

[Monet](#) - Credit Card Optimizer

- App that recommends best credit card to use any merchant. Keeps track of rotating/dynamic categories. Analyzes past transactions and recommends a new card based on spending habits.

Technologies: Swift, TypeScript, AWS

ADDITIONAL ACTIVITIES

Digitization Consultant (Paid Part-time), WPI Nov 2021 – Present
Helping a local business launch their website and market their product the right way to attract more customers.

Executive Board Member, Model United Nations, Mumbai, India 2019
Worked as “Rapporteur” and Executive Board Member at MUN in college. Managed a team of delegates and the entire event. Also co-hosted the award distribution ceremony.
