EDUCATION

Master of Science in Computer Science May 2023
Worcester Polytechnic Institute, Worcester, MA, USA

Bachelor of Engineering in Information Technology Oct 2020
University of Mumbai, India

SKILLS

TypeScript, JavaScript, Java, Clojure (JVM)
NodeJS, AWS, Serverless, Cloudformation, Git, MCP

WORK EXPERIENCE

Software Engineer, Genesys, USA May 2023 – Present

- Piloted Cursor AI to increase team productivity, successfully scaling the tool to 100% of the organization.
- Won internal hackathon prize for building a Model Context Protocol (MCP) server that integrated public APIs with IDEs and Amazon Bedrock, making it extremely user friendly to interact with APIs.
- Designed and implemented AWS Step Function workflow for distributed computing, bringing the total compute time down from hours to under 18 minutes for a key project, ensuring scalability and resiliency.
- Developed a core Node.js utility library adopted by multiple teams to standardize external integrations (HTTP, Database, S3), reducing boilerplate and enforcing security best practices.
- Deployed a robust public API, prioritizing precise schema design and exhaustive error handling to support high-reliability integration for external consumers.

Technologies: TypeScript, AWS, Java, AWS, MCP, API, NodeJs

Software Engineer - Intern, Genesys, USA May 2022 – May 2023

- Led the successful migration of microservices from Hystrix to Resilience4j, ensuring fault tolerance without disrupting the production environment, a critical step in enhancing service reliability and uptime.
- Decoupled testing architecture by enforcing strict separation of concerns, resulting in a more maintainable unit testing suite and a significant reduction in debugging time.
- Streamlined a Kotlin library to accommodate new features and also introducing an efficient code reuse path, effectively reducing the lines of code.

Technologies: Clojure, JavaScript, Microservices, AWS, Resilience4j, Unit Testing

Trainee Assistant Consultant - Software, Credence Analytics, India Mar 2021 – Jun 2021

- Collaborated with the CEO in building ERP system using Python, JavaScript, HTML, CSS, and SQL.
- Deployed Application Monitoring System on Linux Instance using Elasticsearch making monitoring of critical services like AWS, Oracle Database, and microservices effortless.
- Programmed support of Docker and Oracle database in existing Command Line tool, and automated ability to create patch file based on the difference in git branches; cutting the manual work by more than 50%.

Technologies: WSL(Linux), Python, SQL, JavaScript Frappe Framework, NodeJs

Back End Developer - Internship, Credence Analytics, India Aug 2020 – Feb 2021

- Created a command-line tool called [CREDCLI](#) from start to finish using NodeJS to automate version control of the company's software. The tool was created with unit testing and extensive documentation of the code.
- Published a package called [Parsifier](#) in NPM which helps in modifying configuration files thus totally eliminating manual work.

Technologies: JavaScript, NodeJS, Docker, Unit Tests, Git, Elasticsearch

ACADEMIC PROJECTS

Algorithm Management System, WPI Nov 2021

- Created algorithm repository web application as part of grad course using Java lambda functions as backend.
- Hosted the project webpage on AWS S3 bucket, API on the AWS API Gateway, database on AWS RDS, and authenticated users using AWS Cognito.

Technologies: Java, HTML, JavaScript, S3, Lambda, MySQL

ADDITIONAL ACTIVITIES

Digitization Consultant (Paid Part-time), WPI Nov 2021 – Present

Helping a local business launch their website and market their product the right way to attract more customers.

Executive Board Member, Model United Nations, Mumbai, India 2019

Worked as "Rapporteur" and Executive Board Member at MUN in college. Managed a team of delegates and the entire event. Also co-hosted the award distribution ceremony.
